Introduction

Getting to know your new reel

1. Emergency Handle
2. Emergency Handle Bolt
3. Series 26 Quick Connector
4. RML Rotary Joint
5. 8mm Hosetail
6. Push Button Pendant

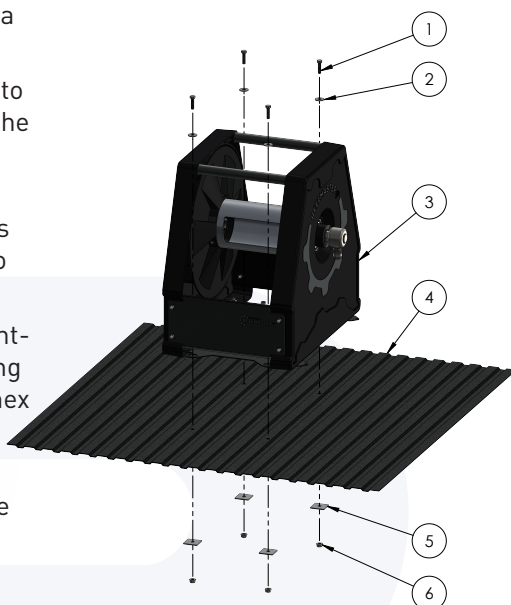

Important Information

The ReelMaster™ Lite is fitted with a resettable fuse. This is located at the end of the power conduit near the battery on the positive wire.

Installation Instructions

Floor Mounted

- Place your ReelMaster™ Lite in a suitable position
- Ensure you leave enough space to manually operate the reel with the emergency handle
- Check underneath the vehicle below where ReelMaster™ lite is situated. Make sure there are no obstructions
- We recommend using four mounting points either the speedy fixing holes on the outside or the M8 hex bolt holes on the inside
- If you are speedy fixing we recommend to mount directly to the chassis
- Once you have found a suitable position drill the holes as shown
- Make sure the drill holes are on the high spots on the van floor if its ribbed

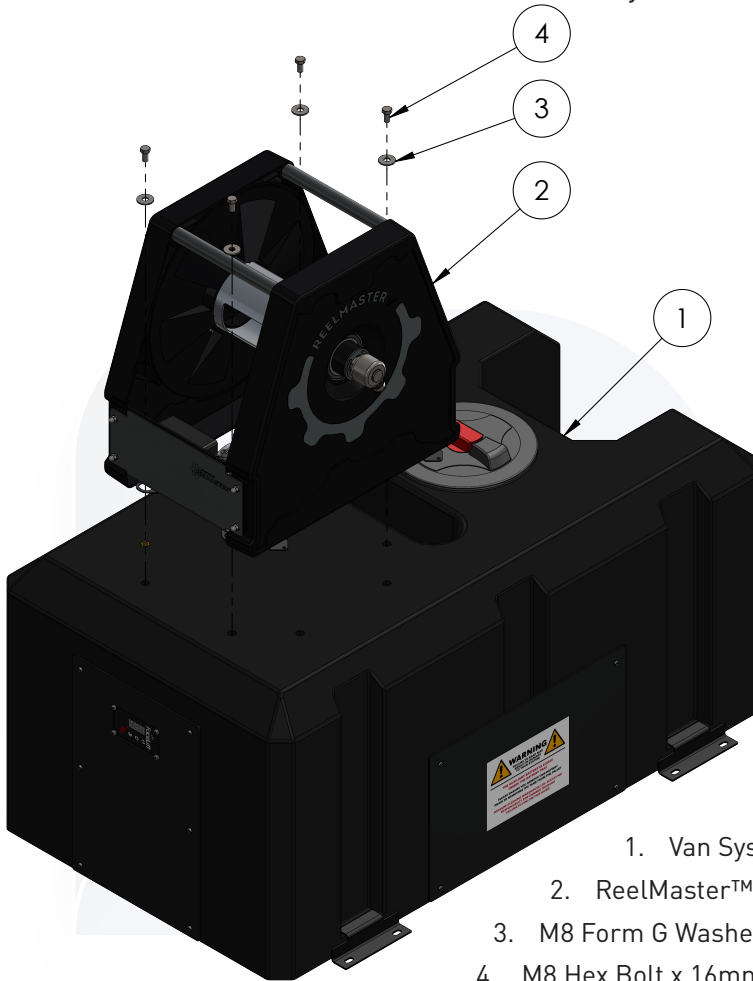

1. M8 Hex Bolt x 35mm x 4
2. M8 Form G Washer x 4
3. ReelMaster™ Lite
4. Van Floor
5. Square Washer x 4
6. M8 Flange Hex nut

Installation Instructions

System Mounted

1. Van System

2. ReelMaster™ Lite

3. M8 Form G Washer x 4

4. M8 Hex Bolt x 16mm x 4

The Systems the ReelMaster™ Lite will mount directly to the following systems:

- 325 Compact
- 425 Compact
- 525 Osmo
- 725 Osmo

Installation Instructions

Electrical Connections

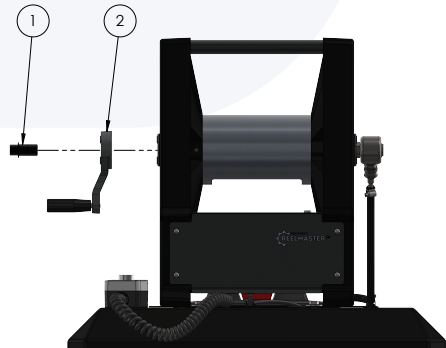

Once your ReelMaster™ Lite has been fixed in position, run the length of conduit up to your system battery in place where it will not be crushed by other items in your vehicle. Ensure Connections are secure.

Emergency Handle

1. Emergency Handle Bolt
2. Emergency Handle

To operate the hose reel manually, align the arrows on the hose reel with those on the emergency handle. Tighten the emergency handle bolt until secure.

Operational Instructions

The ReelMaster™ Lite is a single-speed device operated by a push button. When using the push button pendant, ensure you guide the pipe onto the reel drum.

Unlike the ReelMaster™, the ReelMaster™ Lite does not include soft start or snag protection.

Safety Instructions

Reeling In Hose Your Hose

When operating the ReelMaster™ Lite, ensure hands are kept clear of the reel by maintaining a safe distance. Should the hose pipe become snagged, cease operation immediately and clear the obstruction. Continued reeling with a snagged hose will result in motor damage.
